

Gather Ghana Events.

One warm, trusted platform for planning, paying for, and celebrating Ghanaian events — connecting the **organizer and her team**, the **client**, their **guests & diaspora**, and trusted **vendors**.

For organizers & teams

For clients

For guests & diaspora

For vendors

One platform, four sides of every celebration.

What begins as an enquiry becomes a managed event: quoted, booked, paid in protected stages, staffed by an accountable team, costed to the pesewa, and celebrated on a shareable page that welcomes guests from Accra to the diaspora.

Organizers & teams

Run the whole business: leads, proposals, milestones & escrow, team tasks, books & margins, CSV exports, inbox, vendors, and a who-did-what activity trail.

→ Pages 3-4

Clients

A private portal with the plan, the timeline, proposals to accept, secure Mobile Money & card payments, and escrow they control — the Gather Guarantee.

→ Page 5

Guests & diaspora

Beautiful shareable event pages: RSVP, schedule, gallery, livestream, and gift pools that accept love from any country — settled in GHS.

→ Page 6

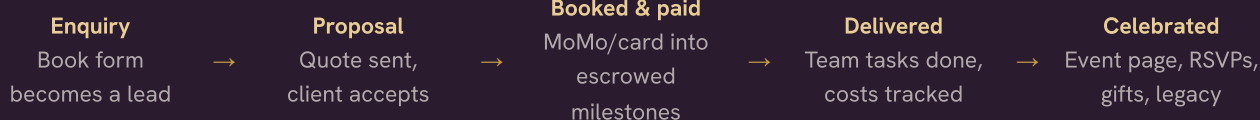

Vendors

A curated marketplace where verified caterers, decorators, photographers and venues are discovered, reviewed, and booked with one WhatsApp tap.

→ Page 7

THE FLYWHEEL — HOW THE SIDES FEED EACH OTHER

GHC-true

All money in protected escrow stages, reconciled automatically from Paystack.

Passwordless

Everyone signs in with a one-tap email link. Nothing to forget, nothing to leak.

1-click books

Margins per event and CSV exports your accountant can open in Excel.

For organizers & your team

Organizer OS

Everything to run the business, at /org

Live dashboard

One screen with the whole business: lead count, event pages, contributions raised, escrow held, open tasks — plus recent leads, messages, and activity.

Leads & proposals

Every enquiry becomes a tracked lead — *new* → *quoted* → *booked* → *completed*. Send titled quotes in seconds; clients accept or decline in their portal.

Milestones & escrow control

Break each event into stages with amounts. Mark funded, request release when a stage is done — the client approves the payout. Disputes freeze funds safely.

Team tasks

NEW

Assign work to named team members with due dates — per event or general. Open → in progress → done; overdue flags in red; filter by person or status.

Expenses & budgets

NEW

Cost lines per event — venue, catering, decor, staffing and more — moving through *planned* → *committed* → *paid*. Planned + committed lines ARE the budget.

Books, margins & CSV export

NEW

Collected, outstanding, costs, and margin — per event and overall. Export events, payments, or expenses to CSV in one click for your accountant.

Activity trail

NEW

Every status change, payment, milestone, task and team action is recorded automatically — who, what, when — on the dashboard and on every client page.

Inbox with real replies

Website messages land in your inbox with read/replied states. Reply from the dashboard — it's emailed to the sender from your own domain.

...and the team around you

Team access, client management, and the marketplace you curate

Team management

Invite teammates by email — they get a sign-in link instantly. Grant or revoke organizer access in one click; core studio accounts can't be locked out.

Client command centre

One page per client: event details & brief, milestones with escrow states, payments, proposals, tasks, costs & margin, and that event's activity trail.

Vendor curation

Add, edit, and verify the vendors couples see in the public marketplace. Your verified badge is the signal of trust — and your quality lever.

Event pages in a minute

Create a shareable celebration page from the dashboard — title, hosts, date, venue, gift goal — and hand the couple a link guests will love.

A DAY IN THE LIFE — WHERE EACH JOB LIVES

YOU NEED TO...	GO TO	WHAT HAPPENS
See the whole business	/org	Stats, leads, messages, activity — live
Assign this week's work	/org/tasks	Tasks with owners, due dates, overdue flags
Close the month's books	/org/books	Margins per event + one-click CSV export
Manage one event end-to-end	/org/clients/...	Milestones, money, tasks, costs, trail — one page
Grow the marketplace	/org/vendors	Add & verify vendors couples can book
Answer the website	/org/messages	Read & reply — sender gets a real email
Onboard a new planner	/org/team · /guide	Invite by email; the built-in guide trains them

Why this matters

No more juggling notebooks, WhatsApp threads and MoMo screenshots. The work is assigned, the money is staged and protected, the costs are counted, and every action leaves a trail. **You manage the business — the platform keeps the records.**

For clients

Client Portal

The couple's private space, at [/portal](#)

The Gather Guarantee

Payments sit safely in escrow per milestone and release **only when the client approves**. Unhappy? Dispute freezes the funds. Trust, made visible.

A timeline they can feel

The plan as a visual journey — every milestone with dates and progress, updated live as the organizer moves things forward.

Pay how Ghana pays

Deposits and balances by **Mobile Money or card** (Paystack). Every payment is confirmed, recorded, and visible — estimate, paid-to-date, and balance.

Proposals, decided in a tap

Quotes appear in the portal with a clear amount and description. Accept or decline — the organizer sees the decision instantly.

Plan now, pay over time

A financing widget turns any estimate into a gentle plan: about 30% deposit plus equal monthly instalments — clarity before commitment.

The planner, one tap away

WhatsApp the organizer straight from the portal. Email confirmations arrive at every important moment — enquiry, sign-in, payment.

THE CLIENT JOURNEY

1 · Enquire

Book form with date, guests & budget →

2 · Sign in

Magic link — no password ever →

3 · Accept

Review & accept the proposal →

4 · Pay staged

MoMo/card into escrowed milestones →

5 · Approve

Release funds as each stage delights

For guests & the diaspora

Event Pages

Public celebration microsites, at [/e/your-event](#)

Gift pools, borderless

Guests contribute to the couple's pool by Mobile Money or card — with a message, optionally anonymous — and watch the goal fill up together.

Made for the diaspora

Aunties in London and cousins in Atlanta see amounts in **their** currency (GBP, USD, EUR...). The couple is settled in GHS. Everyone belongs.

RSVP in seconds

Yes / no / maybe with party size and a message — no app, no account. The host sees the guest list grow in real time.

The day, beautifully told

Cover story, order of events, photo gallery, venue & time — a page worthy of the celebration, in the platform's warm Ghanaian design language.

Livestream for the far-away

Drop in a stream link and the ceremony reaches everyone who couldn't board a plane — right on the event page.

Share where Ghana shares

One-tap WhatsApp sharing spreads the page through family groups. Past events become a living legacy archive. Pages can be public, unlisted, or private.

EVERY CONTRIBUTION IS HONEST MONEY

Gifts flow through Paystack with unique references, are verified by callback *and* server webhook, and reconcile idempotently — a gift can never be counted twice or lost. The organizer sees totals; the couple sees love.

“Akwaaba” isn't a slogan

Adinkra symbols, Kente accents and Twi greetings run through every page — proudly Ghanaian, never a template.

For vendors

Marketplace

Curated & verified, at /vendors

The Verified badge

Organizer-vetted vendors carry a verified mark and rank first. Couples book with confidence; vendors earn placement through quality.

Found by the right couples

Browsable by category — catering, decor, venues, photography, music, cake, makeup — and by location, with "from" pricing in GH¢.

Reputation that compounds

Star ratings and written reviews build each vendor's public profile — social proof that wins the next booking.

Enquiries via WhatsApp

Every profile carries a one-tap WhatsApp contact — couples reach vendors the way Ghana already does business.

Intelligence, culture & comms

The layer that makes it feel effortless

Akwaaba AI concierge

Describe the celebration — get a tailored concept, budget split and vendor shortlist. AI-enriched, with a dependable plan even offline.

[/concierge](#)

Cultural playbooks

Step-by-step guides to Ghanaian traditions — knocking (kokooko), engagement, outdoor — etiquette, budgets and timing.

[/playbooks](#)

Email & chat, built in

Branded transactional email (sign-in links, confirmations, replies) from your own domain; a Telegram bot ready to switch on; WhatsApp-ready webhooks.

AND A BUILT-IN MANUAL

The public [/guide](#) teaches both sides of the platform — organizers (sign-in, leads, escrow, tasks, books, vendors, team) and clients (portal, payments, approvals, event pages) — so new team members and new couples onboard themselves.

Built to be trusted with the big day.

Passwordless by design

Single-use, 30-minute magic links; only cryptographic hashes are ever stored. Sessions are signed and locked to the browser. Nothing to phish, nothing to reuse.

Money that reconciles itself

Every pesewa is an exact integer — no rounding drift. Paystack payments verify twice (redirect + server webhook) and settle idempotently. Escrow states follow strict rules.

A memory that can't forget

The activity trail records every meaningful action with actor and timestamp, and your data leaves whenever you want it — CSV exports of events, payments and expenses.

Fast everywhere, hardened by default

Served from Cloudflare's global edge with strict security headers, content-security policy, validated inputs and parameterized queries throughout.
